

Louisiana Healthcare Connections is committed to a partnership with its providers to promote quality obstetrical care that is provided in accordance with evidence-based medical necessity and clinical practice guidelines. As part of this partnership this OB/GYN PRACTICE OVERVIEW is being distributed to show each practitioner how they compare to the overall average of OB/GYN providers. Group providers treating at least 50 unique members during the reporting period will automatically participate and receive the overview annually.

The overview will include the percentage of members in the practice that meets the denominator requirements for each metric, the plan average for the metric, and as applicable, Medicaid NCQA 75th percentile rate. Providers will only receive a score for metrics that are applicable to their most recent National particular member mix.
