

## EarlySteps Eligibility Criteria

### ICD-9 to ICD-10 Crosswalk

**Purpose:** To assist early interventionists in identifying ICD-10 diagnosis codes using the EarlySteps eligibility criteria. The ICD-10 codes will be required for documentation and for billing for Medicaid-paid services for dates of service beginning 10/1/2015. The list below will replace the eligibility criteria list found in Chapter 5 of the Practice Manual. Diagnoses highlighted in blue are additional codes added to the criteria or added to match the “drop down” code list on the eligibility tab used by the SPOEs in EIDS. In addition, the nature of ICD-10 allows for increased specificity in the use of diagnosis coding, therefore the most specific applicable code should always be used. The sequence of the criteria in the list generally follows the sequence in the Practice Manual with some additional categories added to assist in locating codes. If you have questions, please contact your regional coordinator. **August, 2015 updates are in red.**
