EXECUTIVE SUMMARY

The Louisiana Children’s Health Insurance Program (LaCHIP) is an optional Medicaid program that provides healthcare coverage to uninsured children up to age 19, and to enrollees in the LaCHIP Unborn Option (Phase IV) which provides prenatal care services, from conception to birth, for low-income uninsured mothers who are not otherwise eligible for Medicaid. This program was created by Congress in the Balanced Budget Act of 1997, and enacted on August 5, 1997, under Title XXI of the Social Security Act. In Louisiana, LaCHIP was authorized by Senate Bill 78 of the First Extraordinary Session of the 1998 Louisiana Legislature. Louisiana implemented the first phase of LaCHIP as a Medicaid expansion program in November of 1998. Phase I provides coverage to children and youth in families with income up to 133 percent of the Federal Poverty Income Guidelines (FPIG). Since 1998, there have been four additional phases of LaCHIP:

Program	Income Guideline	Implementation Date
Phase II	150% FPIG	October 1999
Phase III	200% FPIG	January 2001
Phase IV ¹	200% FPIG	May 2007
Phase V ²	250% FPIG	June 2008

Since the inception of LaCHIP, there have been 520,317 children and Phase IV enrollees in the program, which has allowed them to receive much needed healthcare services.

LACHIP STATUS REPORT

PROGRAM OVERVIEW

To be eligible for LaCHIP Phases I, II, III, and V, children must be under age 19, residents of Louisiana, and must meet citizenship and income guidelines. The services covered include doctors, hospitals, prescriptions, mental health, dental, vision, and immunizations. For Phase IV, pregnant women must be residents of Louisiana and uninsured. Citizenship is not a requirement, and coverage is provided through the date of delivery and subsequent case review to determine if eligibility is met for any other programs.

Act 407 of the 2007 Louisiana Legislature authorized the addition of Phase V, known as the LaCHIP Affordable Plan. This program provides coverage to children in families with moderate incomes at a cost of \$50.00 per family per month. To be eligible, these children must not have other insurance coverage and must not have access to the State Employees’ Health Plan. The premium collection functions are administered by the Office of Group Benefits.

¹Prenatal care services from conception to birth for low-income uninsured women.

²LaCHIP Affordable Plan – \$50.00 monthly premium for each enrolled family.

The income limits for LaCHIP Phases I-V are provided below.

Monthly Income Limits (Effective 2/1/2014)

FAMILY SIZE	LaCHIP Phase I Monthly Income 147% FPIG	LaCHIP Phases II-III Monthly Income 217% FPL	LaCHIP Phase IV Monthly Income 214% FPL	LaCHIP Phase V Monthly Income 255% FPL
1	\$1,430	\$2,111	\$2,082	\$2,480
2	\$1,927	\$2,845	\$2,806	\$3,343
3	\$2,425	\$3,579	\$3,530	\$4,206
4	\$2,922	\$4,313	\$4,254	\$5,069
5	\$3,419	\$5,048	\$4,978	\$5,931
6	\$3,917	\$5,782	\$5,702	\$6,794
7	\$4,414	\$6,516	\$6,426	\$7,657
8	\$4,912	\$7,250	\$7,150	\$8,520
More each additional household member, add this amount.	\$498	\$735	\$725	\$863

DHH staff and contractors have done a superb job of providing information about LaCHIP to the public and ensuring that DHH has the most up-to-date information on children to ensure their continued coverage. As a result of this concerted effort, only 4.4 percent of Louisiana’s children are uninsured.³ In addition, efforts to ensure retention for those who still qualify mean that very few people lose coverage at their annual case review.

Louisiana’s success in providing health coverage to uninsured children through a combination of technical and policy improvements has been studied by national organizations and used as a model for other states’ children’s public health coverage programs. A report by Health Management Associates, based upon extensive information gathering and site visits, revealed the following about the management of LaCHIP⁴:

- Louisiana has leveraged both technological and policy solutions to create customer-oriented, simplified enrollment and renewal processes.
- An integrated culture of and sustained commitment to continuous quality improvement has helped Louisiana repeatedly simplify the steps that families and workers follow in enrolling and renewing coverage.
- Louisiana has made children’s health insurance programs and their management seamless, reducing complexity for families and aligning workers under a single set of goals.

To provide support to the growing number of residents of Louisiana who have limited or no English proficiency, DHH formed the Strategic Enrollment Unit (SEU) in 2004. The unit provides service to applicants and enrollees in the language that they choose. This unit consists of nine bi-lingual Medicaid Analysts, seven Spanish and two Vietnamese, who provide services to all applicants and enrollees across the state who choose a language other than English as their primary language. SEU staff also provides community service by attending community events where they may reach current enrollees and educate the public on the availability of CHIP coverage.

PROGRAM STATUS

Enrollment

As of January 1, 2015, there were 125,615 children and Phase IV enrollees in LaCHIP.

	SFY13	SFY14	SFY15
Phase I	46,178	45,716	43,131
Phase II	34,856	35,384	33,447
Phase III	35,033	36,716	40,569
Phase IV	1,498	2,249	2,730
Phase V	3,584	3,285	3,008
Total	121,095	123,350	125,615

Total Expenditures

	SFY13	SFY14	SFY15 (7/1/14-12/31/14)
Total	\$194,039,282	\$203,027,833	\$104,993,408

Per Member Per Month Cost

	SFY13	SFY14	SFY15 (7/1/14-12/31/14)
Total	\$131.25	\$139.16	\$145.13

CONCLUSION

The Louisiana Children’s Health Insurance Program benefits all citizens of Louisiana. Currently, 125,615 children and pregnant women have access to much needed healthcare coverage. National research has shown that healthy children do better in school on many levels. According to the Kaiser Commission on Medicaid and the Uninsured, “Studies of SCHIP’s impact have found an association between enrollment in the program and improved school performance among low-income children. Improvements include increased school attendance, greater ability to pay attention in class, improved reading scores, and increased ability to participate in school and normal childhood activities.”⁵ Work continues statewide to enroll the remaining uninsured but eligible children.
